

# How to add an image at a specific location in MSWord Using C#?

Asked 6 years ago    Active 4 years, 9 months ago    Viewed 3k times

```
using word = Microsoft.Office.Interop.Word;
```

0

How do I add an image at a specific co-ordinate of the Word documents.

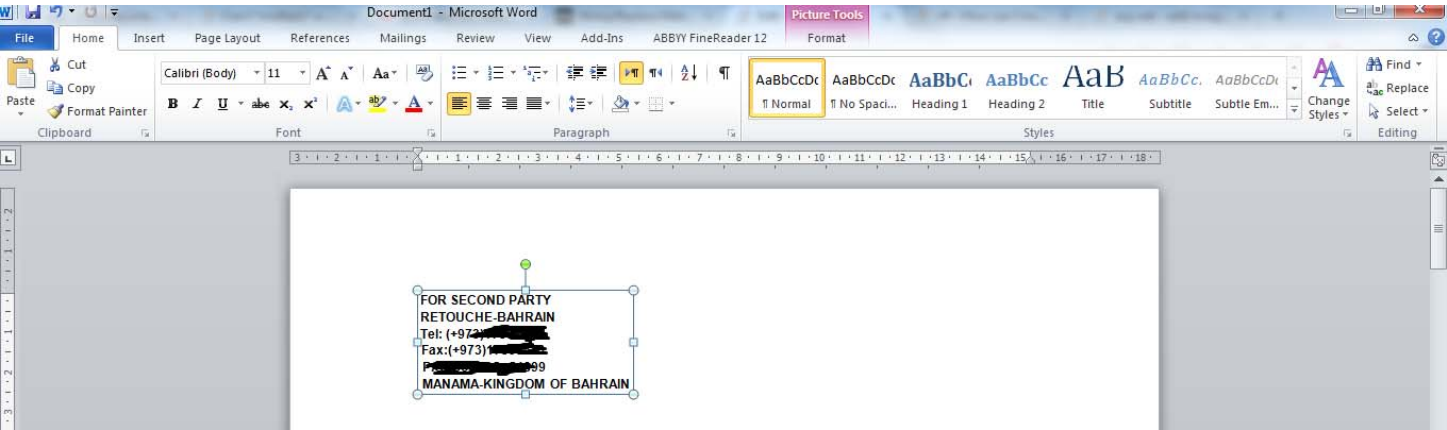

I have been searching for a while, but unsuccessful in finding a solution for this problem.

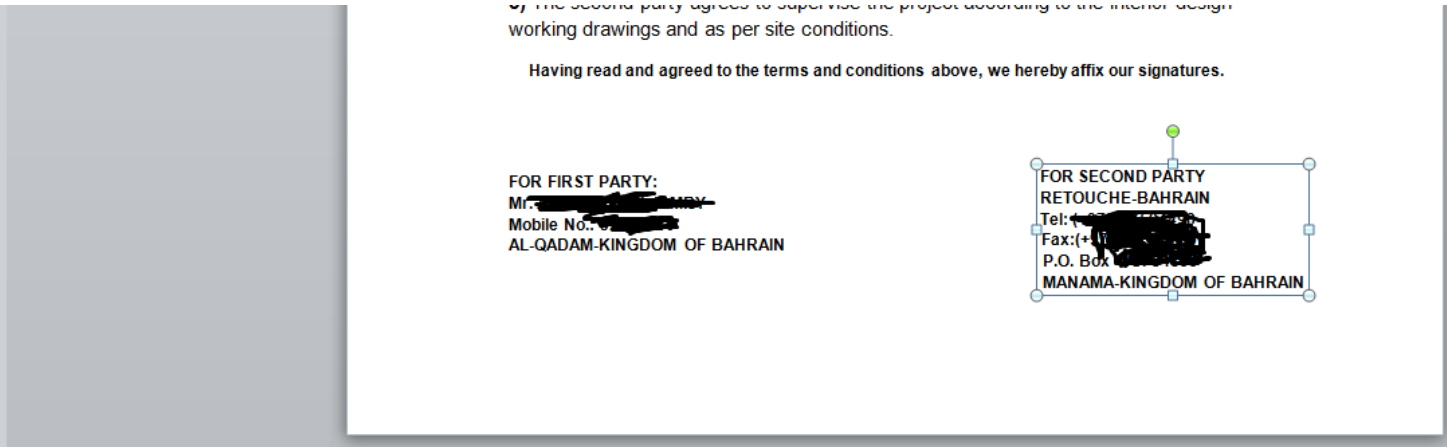

**EDIT** Currently using :

```
oDoc.Application.Selection.InlineShapes.AddPicture(@"C:\Users\MHD\Desktop\retouche.bmp");  
  
oDoc.Application.Selection.MoveDown(word.WdUnits.wdScreen, 2);
```

## Problem:

## What is needed:

So the image should be located at the bottom right corner of the last page in the document.

Instead of inserting a inline shape which is positioned within the text. You may want to insert as a normal shape, which can be positioned anywhere above the text:

```
oDoc.Application.ActiveDocument.Shapes.AddPicture(  
    @"C:\Users\MHD\Desktop\retouche.bmp",  
    null, null,  
    left, top, width, height)
```

one way to do that is:

- open your word document > add a bookmark named: "PicHere"
- and then [check this link](#)
